
S-3000

Glass partition

S - 3000

Single glass partition system

The S3000 partition series offers a complete solution in creating modern professional spaces.

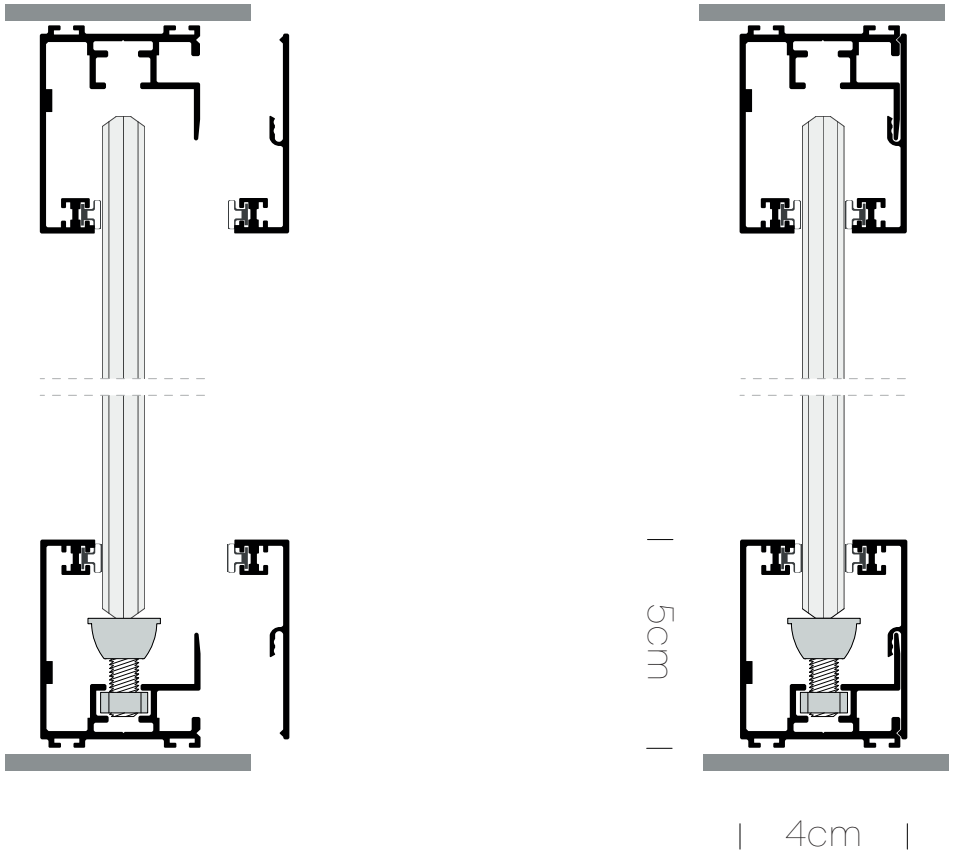
With use of aluminum and glass in combination with the absence of vertical metal support elements, the S3000 partition series enables the creation crystal clear surfaces.

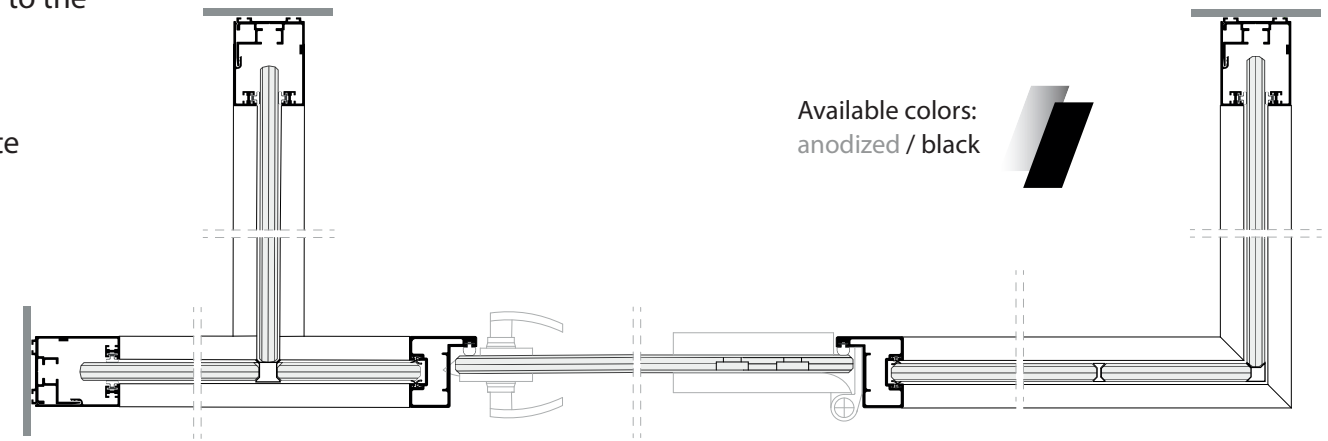
With minimal design S-3000 series offers visual communication in the work environment and also privacy .

According to measurements S-3000 single glazed acoustic partition will provide sound protection of up to 36dB.

The 8-10mm glass panes apply together with polycarbonate unitary profiles, ensuring uniform effect and safety. Pvc is applied to the glass and aluminum contact points.

Aluminum door frames with glass doors 10mm or laminate doors 32mm can be applied to the system





Available colors:
anodized / black

S - 3000 · D

Double glass partition system

The S-3000D partition series for double glazing with a gap, offers a complete solution for professional spaces of modern design and sound absorption requirements.

The 8-10mm glass panes apply together with polycarbonate unitary profiles, ensuring uniform effect and safety. Pvc is applied to the glass and aluminum contact points.
